

DIGISTARS

MAKE-A-MOVIE WORKSHOP

Digital Storytelling Programs for KIDS

Bring Digistars® Moviemaking Programs to Your Area!

Our digital storytelling programs are designed to engage elementary through high school students in a professional movie production process. Each program is scalable to accommodate from five to fifteen hours of instruction, making it easy to adapt to varying schedules while still guaranteeing that students always emerge with **new knowledge**, a **complete movie**, and a true **sense of achievement**. Integrating art and technology with academics develops creativity and enhances learning while building strong **literacy** and **computer skills**, and moviemaking demands **teamwork** and **collaboration**.

Art/Technology Integration • Grades 1-8 • Educationally-valid • 5-to-15-hour Programs

Robust Each curriculum has been **honed and tested** over seven years with hundreds of students, and includes easy-to-follow teaching guides and instructional videos along with sample videos for discussion and analysis.

All material delivered electronically.

Turnkey Digistars programs are designed to be run by leaders without any artistic ability, filmmaking experience or technical knowledge, and can be led by teachers, paraprofessionals, university students, or even involved parents.

No previous experience necessary.

Multiple Program Formats

- Overlay onto existing academic studies
- After-school enrichment programs
- Single-day camps
- Weeklong camps
- Weekend workshops

Multiple Curricula

- Stop motion animation (**Claymation!**)
- Live action filmmaking using **green screen** technology
- Documentary filmmaking (**Ken Burns-style**)

Email Digistars to discuss the possibilities!
